Dept. of Natural Resources.
Division of Oil, Gas and Mining
1594 West North Temple, Suite 1210
Salt Lake City, Utah 84114-5801

Dear Mr. Munson.

The following is our proposed Plan of Operations for Travertine I in Juab County, as requested by the Department of Natural Resources, Division of Oil, Gas and Mining.

We propose to remove the Limestone, approximately 35' thick at the top tapering to zero thickness at the bottom. The sagebrush and Cedar trees that grow through the rock will be re-placed by the re-vegetation mixture assigned by the DOGM.

When B.E.G. Resources completes mining at the Travertine I site, there will be no high walls left. A flat ground in contour with the existing landscape will remain.

We propose to remove any top soil that may be in the area, and stockpile it until the appropriate time arrives to return the top soil to it's original state. That time determined by the completion of all mining projects on the Travertine I site. Upon completion of all mining projects we will bring in a CAT-D9R and a 12" disc to be used for all reclamation work at the Travertine I site.

A criteria of our mining project is to sell all material mined, therefore we will not have any waste material to be handled.

Because all material will be drilled, shot, and removed, there will not be any drill or bore holes left in the area.

The Sevier River, 3 1/2 miles SW of the mine site, is the closest water source. Travertine I does not effect this water way nor does it effect any water fowl in the area.

Big game species are found in the area, specifically mule deer, but have not been seen

Big game species are found in the area, specifically mule deer, but have not been seen in the pit or mining operations area.

We appreciate your patience and cooperation in allowing us an extension of time to complete our new large mining permit. We hope that the above proposal and permit application will meet to your satisfaction. Upon review of said material, if there is any further information needed please notify me Neal Jensen and I will be happy to supply any necessary additional information to you. Thank-you again!

Sincerely,

A handwritten signature in cursive script, reading "Neal Jensen".
